

- [1] Create a SINGLE ChemDraw document using ACS format and 10 point Arial for atoms and text.
- [2] Starting from commercially available starting materials, show each step (one reaction per arrow) for the sequence you plan on submitting. Checking supplementary sections and earlier papers might be needed.
- [3] For CONVERGENT syntheses, draw the complete sequences for each branch point following the same formatting instructions. List these as subsequence #1, #2 etc. at the end of the ChemDraw document.
- [4] **Abbreviations:** If an abbreviation for a reagent, catalyst, solvent etc. is not already featured on our site, then draw its structure with the compound name below and include in the ChemDraw document.
- [5] **FILE NAME:** goniothalesdiol2010Njardarson.cdx. Submit to ChemistryByDesign@gmail.com
 Natural product name year professor
